

International Summer School Session on the Atmospheric Boundary Layer Les Houches, France, 17–27 June 2008

In this summer school, PhD students and young scientists will be introduced to the latest developments in theoretical concepts, observations and numerical techniques in boundary-layer meteorology. Outstanding lecturers will present key concepts and issues and, in the modeling and simulation session, participants will receive hands-on experience with a selection of numerical techniques to study boundary-layer flows.

The school is limited to a maximum of 50 students. A tuition fee of €600 is due, which also covers accommodation, meals and study material.

If you are interested in this course, please send an email to h.vandop@phys.uu.nl and we will identify you as a potential participant.
